From Poland, Wroclaw.

## About

I am a **WordPress** developer who creates websites using technologies such as **HTML**, **SCSS**, **Gulp**, **JavaScript**, and **WordPress**. I have been involved in providing technical support for websites, including content editing and fixing minor bugs, for a technical high school. I am interested in information technology and its impact on business transformation. Recently, **UI/UX** design has become my hobby. [Portfolio](#).

## Skills

HTML5, CSS3, RWD, JavaScript, Figma, Git, WordPress CMS, SASS, SEO, Gulp,  
English - B1, Ukrainian - native, Polish - B2, Russian - C2

## Experience

### WordPress developer at technical high school TerraNova

**August, 2023 — present**

I am responsible for administering the website, editing, and adding new content. Currently, I am working on developing a website project to improve its aesthetics and architecture to increase performance and optimize for SEO.  
Stack: WordPress, HTML, CSS, JavaScript, Gulp, SCSS, Figma.

### Experience prior to professional development:

**September 2022 — August 2023**

I was involved in running a business in the real estate rental industry. My responsibilities included seeking clients, residential properties, as well as handling documentation, translations, and communication between clients and property owners.

## Education

September 2021 — present

Programming Technician, TerraNova Technical High School
